Art Unit: 2452

DETAILED ACTION

1. This action is in response to Applicant's amendment filed on 4/9/2009. Claims 1, 11-13, 15, 19-21, 26, and 27 are amended. Claims 3-5 and 8 were previously cancelled. Accordingly, claims 1, 2, 6, 7, and 9-31 are presented for further examination.

2. Because this action contains a new ground of rejection that was not necessitated by Applicant's amendment, this action is a non-final rejection.

Allowable Subject Matter

3. Claims 1, 2, 6, 7, and 9-25 allowed.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 26-31 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Independent claim 27 recites an apparatus comprising a selector, a path, and a runtime engine. Merely relying on the term "apparatus" in the preamble does not immediately render the claim statutory under § 101 as a machine or manufacture. Only if at least one of the claimed elements of the apparatus is a *physical* element can the apparatus as claimed constitute a machine within the meaning of § 101.

Here, the claimed three elements of the apparatus are all software components. It is

Art Unit: 2452

important to note that the personal data assistant and the remote computer are not being claimed as part of the apparatus. The claimed selector, path, and engine are not physical, hardware components that would require interpreting the claimed apparatus as a machine.

Instead, because the elements are software, the claimed apparatus is merely an arrangement of software. Software is not statutory under § 101. Thus, claim 27 is rejected for being directed to non-statutory subject matter. For similar reasons, claim 26 is also rejected for being directed to non-statutory subject matter.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 26 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 26 is presumed to invoke 35 U.S.C. § 112, sixth paragraph because it employs means-for language, the means-for language is modified by functional language, and the means-for are not modified by sufficient structure for achieving the specified function. *See* MPEP § 2181(I).

“If one employs means plus function language in a claim, one must set forth in the specification an adequate disclosure showing what is meant by that language. If an applicant fails to set forth an adequate disclosure, the applicant has in effect failed to particularly point out and distinctly claim the invention as required by the second paragraph of section 112.” *See* MPEP § 2181(II) (citing *In re Donaldson Co.*, 16 F.3d 1189, 1195 (Fed. Cir. 1994) (in banc)).

Art Unit: 2452

Here, the examiner could not find adequate disclosure showing what is meant by each of the five different means being claimed in claim 26. To overcome this rejection, Applicant should cite specific portions in the specification which adequately describe each of the means being claimed.
